Seeing beyond

Did you know that spectacle lenses can help make driving safer and more relaxed, even in the rain and at night?

- Difficulties in detecting objects fast enough in low-light conditions such as rainy days, in twilight or at night?
- Disturbed by glare from oncoming cars at night?
- Problems refocusing when you look from the road to the dashboard and your rear-view and side mirrors?

Driving can be a real challenge for everybody – no matter how long the distance. Good vision is vital for safety.

ZEISS DriveSafe Lenses – an everyday lens solution that helps drivers feel safer and more comfortable.

One pair of glasses for everyday use and more comfortable driving.

ZEISS DriveSafe Lenses are available in both single vision and progressive lens types.

Benefits of ZEISS DriveSafe Lenses

Accurate vision of the road, dashboard, rear-view mirror and side mirrors.*

Reduced glare at night from oncoming cars or street lights.**

Better vision in low-light conditions thanks to Luminance Design® Technology.***

*Compared to ZEISS premium progressive lenses **Compared to premium ZEISS coatings ***As tested by FKFS Research Institute of Automotive Engineering and Vehicle Engines Stuttgart, an independent foundation associated with the University of Stuttgart. For more information on ZEISS DriveSafe lenses please refer to the ZEISS White Paper
