

**Give your job the
vision it deserves.**

ZEISS Office Lens

Seeing beyond

Progressive lenses:

The intermediate viewing zone provides a limited field of clear vision.

Effects on posture:

- Wearers lift their head to use the intermediate lens areas.
- Results in strained neck and shoulder muscles.

Solution: ZEISS Office Lens

ZEISS Office Lens is customised for an office environment, ensuring good posture is maintained and maximum visual fields are provided for near and intermediate work.

The best choice during screen time.

ZEISS Office Lens

Working in an office or home environment, we increasingly use computers and digital devices as an integral part of our lives. However, spending most of the day in front of a screen can lead to visual stress, which can be easily overcome with the correct lenses.

Some lenses can create ergonomic issues

Reading or progressive lenses are not ideal for desk and computer work, contributing to ergonomic discomfort and visual stress.

Reading lenses:

The lens provides a clear field of vision for objects within a close distance.

Effects on posture:

- Wearers lean in towards objects to bring them into focus.
- Results in unnecessary strain on the neck and back.

Better vision and more comfort at work.

ZEISS Office Lens

ZEISS Office Lens is designed for indoor use where near and intermediate vision is important. ZEISS Office Lens offers a large field of vision at close and intermediate distances, giving you an unimpaired view of the screen, allowing a natural posture and sitting position. They can also be optimised to match any specific intermediate viewing distance.

ZEISS Office Lens:

The custom-made solution gives wearers crisp, clear vision of the three working area distances, according to the individual wearer needs:

1. reading, 2. workplace and 3. room distance.

Effects on posture:

- Wearers hold their head and neck in a natural posture.
- Complete comfort all day long.

The ZEISS Office Lens provides clear, sharply focused vision in the near and intermediate ranges with large fields of vision. ZEISS Office Lens ensures relaxed, natural vision in the office and allows more comfortable posture for working in the near and intermediate ranges.

Comfortable vision indoors – no matter where you look.

Printed on 99% recycled material

Additional visual comfort in artificial light.

ZEISS DuraVision® BlueProtect UV

Modern light sources and digital screens emit a high amount of blue light, which contributes to more eye strain². ZEISS DuraVision BlueProtect UV lens coating reflects a portion of high energy blue light, delivering clearer and more comfortable vision.
